PROFILE

MERN stack developer with practical experience in frontend and backend technologies. Proficient in building responsive web applications and implementing creative UI/UX designs. Looking forward to applying technical skills and creativity to exciting development opportunities.

EXPERIENCE

LUNAR ENTERPRISES TRIVANDRUM

FULL STACK DEVELOPER (JULY 2025 - PRESENT)

- Contributed as a full-stack developer with a primary focus on frontend development, independently handling the entire project from start to finish, delivering all tasks within the timeline while managing client discussions and requirements effectively.
- Designed and developed responsive and interactive web interfaces with a focus on usability and aesthetics.
- Configured and integrated Razorpay and Stripe payment gateways, ensuring reliable payment workflow
- Utilized Shiprocket for end-to-end shipping management, enabling smoother delivery coordination and customer tracking.
- Implemented real-time communication using Socket and enhanced user engagement through Twilio-based SMS and OTP notifications.
- Integrated services like Google Translation to support multilingual content and make the platform accessible to a global audience.

NEYNDRA GLOBAL SOLUTIONS PRIVATE LTD, TRIVANDRUM

JUNIOR SOFTWARE ENGINEER (FEB 2025 - JULY 2025)

- Worked across both frontend and backend development to build and deliver fully functional, responsive, and user-centric web applications.
- Collaborated effectively in a team environment to build scalable full-stack solutions.
- Gained hands-on experience in WordPress development, including theme customization, plugin integration, and responsive design implementation.

- MONGO DB
- WORDPRESS

PROJECTS

- Ishtam Marry (ishtammarry.com)

Ishtam Marry is a matrimonial and dating platform designed to help users find compatible partners. Users can create profiles, set partner preferences, view suggested matches, send connection requests, and communicate through an integrated chat system.

The platform includes an admin panel for managing users, monitoring activities, and assigning subscription plans with dedicated premium features.

- Bhakshanangal Foods (bhakshanangal.com)

Bhakshanangal Foods is an international e-commerce platform offering Kerala's traditional food products to selected countries. The system includes Shiprocket integration for efficient shipping, automated currency conversion for global users, a coupon and discount module, secure international payments through Stripe, and Google Translation integration to allow users to switch languages based on their preference.

The platform provides a comprehensive admin panel that streamlines the management of homepage banners, language settings, product variants, promotions, coupons, orders, and shipping configurations. (admin.bhakshanangal.com)

- David's Academy (davids-academy.com)

David's Academy is a full-featured learning platform where students can attend exams, use question banks, watch recorded classes, and monitor their progress. It includes around 10 types of questions such as MCQ, fill in the blank, drag and drop, dropdown, sentence questions, and match the following questions.

The platform also includes a powerful admin panel that enables administrators to create and manage questions, schedule exams, upload recorded classes, and oversee student data. It provides detailed analytics to evaluate each student's study progress, ensuring smooth operational control and efficient academic management.

- Shifa Clinic (shifaclinic.lunarenterprises.co.in/)

Shifa Clinic is a hospital management system with five roles: Admin, Receptionist, Doctor, Pharmacist, and Lab. Admins can create and manage users, assign roles, and monitor system activities, while Twilio OTP integration ensures secure user verification. Receptionists register patients and generate tokens for consultations.

Doctors attend patients by token number, review and update medical records, mark vitals, access consultation history, refer lab tests, and prescribe medicines using an S-Pen-enabled scribble canvas. Labs process test requests, and Pharmacists view prescriptions, dispense medicines, and add notes, creating a fully integrated and efficient clinic workflow.

TOOLS

- GIT
- VS CODE
- POSTMAN
- MONGODB COMPASS
- VERCEL
- ANTIGRAVITY
